Vol. 45, No. 6, November–December 2008

2008 *Journal of Spacecraft and Rockets* Index

How to Use the Index

In the Subject Index, pages 1331–1336, each technical paper is listed under a maximum of three appropriate headings. Note the locating number in boldface type preceding each paper title, and use that number to find the paper in the Chronological Index. The Author Index, pages 1337–1338, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 1339–1343, also lists all papers by their locating numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 2008, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.
